

SPRING CARE OF APIARY.

The Precautions Which Should be Taken to Protect Bees.

Bees will do better if they are pro tected in some way after being set from the cellar. Winter cases have been recommended for this purpose, and they are good, but expensive. Recently, however, tarred building paper has been used, with very satisfactory results. In some cases the whole hive, except the bottom, has been wrapped in the paper, but it makes it necessary to remove the covering every time the hive is to be opened. I have, therefore, devised a different way of

Paper Overcoat for Hive.

using building paper, says a writer in Farming.

I cut a piece of the tarred building paper so that it will be as wide as the hive is deep-that will he nine and one-half inches for Langstroth hivesand long enough to cover all four sides of the hive and also have the ends overlap several inches.

The first fine day after the bees have been put outside, I take an empty hive body and fasten to it the bottom board with double-pointed crate staples. Then lay the hive body on its side and fasten the paper at one corner with a thin strip of woodmine was sawed out of dry goods box When the first corner is fastened it is an easy matter to wrap the paper and tack on the rest of the strips.

After the hive is fixed and set on the place of one containing bees, I remove the combs and bees from that hive and put them in the hive that has been protected by building paper. I then shake all of the bees out of the hive from which the combs have been removed and wrap it with paper, and proceed thus until all of the colonies are protected.

I have never known any kind of cover with which a hive could be closed so tight that no heat could escape from the cluster, yet some bee keepers use nothing under the cover to prevent the loss of heat. I use an enameled sheet, with the smooth side toward the bees, and on this pieces of old carpets or sacking, or pieces of building paper, cut large enough to cover the top of the hive, but not overlapping. With an enameled sheet, tarred paper would probably not be an objection to the bees, but as it might, it is better to substitute the kind of building paper used for houses; place it on top of the hive-and, of course, under the cover.

Whenever a hive is opened in early spring, heat escapes rapidly, which is a great objection, because some of the brood may be chilled and the colony given a great setback. Whenever manipulations are necessary during the spring months a quilt should be used to cover the hive while it is open. Make it of several thicknesses of heavy cloth, and have one side dark colored and the other side light, and large enough to hang dawn several inches on all four sides. The darkcolored side should be up during cold weather in spring; for if the sun is shining some of its heat will be better absorbed. The light-colored side of the quilt is for use during the warm season when it is necessary to manipulate frames while robbers are bad. When a hive is opened, the quilt should be thrown over the ton. Roll it. back, and when a frame has been removed, cover up the top of the hive

FARMERS AND POULTRY.

The Kind of Pure Bred Poultry Which Should Be Bought.

The farmer has a real grievance against the poultry fancier, in that he has done all of his crossing and inbreeding of fathers, daughters, uncles and aunts without any regard to practical utility, says Farming, whether the hens from which he has been breeding were producing 60 eggs a year or 200 made no difference. His whole aim has been to breed out of a foul flight feather or two or to create a better comb, an eye or a better tint at a sacrifice of everything else. The result is that when a farmer goes into the market to buy pure breeds, with his money in his pocket ready and willing to pay for the best stock, he not only often pays for qualities he does not need, but actually pays a premium for something that has been obtained at a sacrifice of the very qualities which he does need. There are a few men, however, raising pure bred stock that is "bred to lay," or to meet certain market demands, and those are the men that should be patronized.

Hatch Early.

In raising poultry for market, usually the profit lies in hatching early, pushing the chickens forward as rapidiy as possible and marketing them Spring chickens at spring prices pay better than fowls sold later on, when, though the fowls weigh more, there is not only the lower orice, but additional feed for perhaps two or three months must be taken

Eggs that have been kept two or three weeks will produce weak chickens. If they live to get their growth they will never be strong nor healthy The germ of the egg becomes weak ened with age. Only fresh, new eggs should be set.

There is always room for a man of force, and he makes room for many.

A Natural Remedy—Garfield Tea! It is made of simple Herbs. Take it for consti-pation, indigestion, sick-headache; it reg-ulates the liver, purifies the blood, brings Good Health.

The average woman makes a strepdous effort to discover her husband's faults for the purpose of hiding them from other people.

Nervy Reggle.

"Look here, young man," thundered the old gentleman as he came down the stairway three steps at a leap. "Didn't I tell you if ever I caught you around here again I would play football with you?"

"Yes, sir, I think you did," replied the calm youth. "And yet you have the cheek to call

"Oh, yes, sir. You see football is now out of season."

FIFTEEN YEARS OF ECZEMA.

Terrible Itching Prevented Sleep-Hands, Arms and Legs Affected -Cuticura Cured in 6 Days.

"I had eczema nearly fifteen years. The affected parts were my hands, arms and legs. They were the worst in the winter time, and were always itchy, and I could not keep from scratching them. I had to keep both hands bandaged all the time, and at night I would have to scratch though the bandages as the itching was so severe, and at times I would have to tear everything off my hands to scratch the skin. I could not rest or sleep. I had several physicians treat me but they could not give me a permanent cure nor even could they stop the itching. After using the Cuticura Soap, one box of Cuticura Ointment and two bottles of Cuticura Resolvent for about six days the itching had ceased, and now the sores have disappeared, and I never felt better in my life than I do now. Edward Worell, Band 30th U. S. Infantry, Fort Crook, Nebraska."

That is the Story of a Michigan Farm er Who Lives in Western Canada.

Olds, Alberta, Dec. 10, 1906. Mr. M. V. McInnes, Detroit, Michigan: Dear Sir and Friend-It will be four years next May since I came to Olds. and have lived here ever since.

Since I came here wheat has run from 25 to 45 bu. per acre, oats from 65 to 115, that I know of. I raised that last year, 115 bu. to the acre of the finest oats I ever saw, and oats that I sowed 31st day of May this year went 721/2 to the acre and weighed 41 lbs. to the bushel. My barley went 40 bu. last year and 50 this year. and was not sown until the latter part of May. I had 3 acres of potatoes this year and sold 700 bushels and put 275 bu, in the cellar, and no bugs to pick.

We have a fine Government Creamerv at Olds. Our cows made \$41 per head and I didn't feed any grain; only prairie hay, so you see we are doing well. We have the patent for our homestead now and am very thankful that we came to Alberta. We have made a little over \$1,000 each year besides making our living. I would not go back to Michigan to live for anything. If I had my choice of a ticket to Olds or a 40-acre farm in Michigan I would take the ticket and in two years I could buy any of them 40-acre farms. This is the country for a poor man, as well as a man with money.

I will close, thanking you for our prosperity, I remain yours truly, OTTO YETTING, (Signed)

Olds, Alberta, Canada. Box 159. Information as to how to secure low rates to the free grant lands of Western Canada can be secured of any Canadian Government agents.

BUTTON THEIR OWN WAISTS.

New York Women Have Surmounted Great Obstacle.

Marvelous as it may seem, New York women have lately discovered a way of fastening their waists up the back without calling for assistance. Thought not lacking in generosity, they became so tired of the outstretched palm of the chambermaids that they now feel that it is time to guard their pockets. The Gotham woman discovered that if she put her blouse on hind side before, with the sleeves hanging free, it could be fastened from top to bottom, with the exception of the hooks at the neck, and then turned around and the arms slipped into the sleeves without unduly straining the fastenings. So simple! So strange that no one had thought of it before. Or is it possible other women have used the plan and meanly kept it to themselves? Will the waist that buttons in the back now have a new lease of life?

DURING THIS MONTH

Excellent Advice Which Our Readers Will Benefit By.

Now is the time to get the rheumatic poisons and foul acids from the blood and system, states an eminent authority, who says that Rheumatism and Kidney trouble are caused by the blood, which often becomes sour from of the wool, but also in part, of excessive acids, and also tells what to do to make it pure and healthy.

PE-RU-NA A MEDICAL COMPOUND

In any medical compound as much depends upon the manner in which it is npounded as upon the ingredients used.

Rosenthal, the planist, is one of those entitled to have his crankiness First, there must be a due proportion of the ingredients. Each drug in the termed "the eccentricities of genius." pharmacopeia has its special action. To combine any drug with other drugs says the San Francisco Chronicle. that have slightly different action, the combination must be made with strict reference to the use for which the compound is intended. The drugs may be When he inspected his rooms at the well selected as to their efficacy, but the compound ENTIRELY SPOILED BY Majestic upon his arrival very late the THE PROPORTION in which they are combined. other night, he went softly to the ad-

It takes years and years of experience to discover this proportion. There is no law of chemistry, of pharmacy, by which the exact balance of proportion can be determined. EXPERIENCE IS THE ONLY GUIDE.

In compounding a catarrh remedy Dr. Hartman has had many years' experience. In the use of the various ingredients which compose the catarrh remedy, Peruna, he has learned, little by little, how to harmonize the action of each ingredient, how to combine them into a stable compound, how to arrange them into such nice proportions as to blend the taste, the operation and the chemical peculiarities of each several ingredient in order to produce a pharmaceutical product beyond the criticism of doctors, pharmacists or chemists.

WE REPEAT, THAT AS MUCH DEPENDS ON THE WAY IN WHICH THE DRUGS ARE COMBINED AS DEPENDS UPON THE DRUGS THEM-

The compound must present a stability which is not affected by changes of temperature, not affected by exposure to the air, not affected by age. It must be so combined that it will remain just the same whether used in the logging or mining camps of the northwest or the coffee plantations of the tropics.

A complete list of the ingredients of Peruna would not enable any druggist or physician to reproduce Peruna. It is the skill and sagacity by which these ingredients are brought together that give Peruna much of its peculiar claims as an efficacious catarrh remedy.

However much virtue each ingredient of Peruna may possess, the value of the compound depends largely upon the manner and proportion in which they are combined. The right ingredients, put together rightly, is the only way a

For Girls & Women

You Need Cardui

At every age, after entering womanhood, girls and women need the strengthening, building, pain-relieving assistance of Wine of Cardui. It will carry you over the rough places, ease your hard days and increase the comfort and pleasure of living.

What its millions of users think of it, is well expressed in these words of Mrs. Rosa Lee Cole, of Smithton, Mo., who writes: "I suffered from female troubles for 7 years. I had pain, low down in my stomach, my feet hurt so I could not stand, and I was so weak and nervous I could hardly do anything. I was just sick all the time. At last I wrote you for advice and you recommended Wine of Cardul, which I took according to your directions. I have now taken

5 bottles of Wine of Cardui, and am feeling better than in the past 7 years. My feet and stomach do not hurt, my female troubles have gone, I am getting stouter and stronger, can do all my housework, work in the garden and tend to 260 little chickens."

Wine of Cardul acts directly upon the sick or disordered womanly organs or functions. It is a natural, scientific, female tonic. It contains no dangerous minerals, or other deleterious ingredients, but is purely vegetable, perfectly harmless and beneficial to young and old. Every reliable druggist sells it, in \$1 bottles. Try it.
